## SHEPSHED URBAN DISTRICT COUNCIL

# Medical Officer of Health's Report, 1956

Medical Officer of Health:

A. McM. W. SEGERDAL, M.D., D.P.H.

Surveyor, Public Health Inspector and Water Engineer:

R. B. JONES, Cert. R.S.I.

Clerk to the Council: H. W. BERESFORD

Chairman of Council: P. H. JORDAN, J.P.

Public Health Committee Chairman: P. H. JORDAN, J.P.

Housing Committee Chairman: J. H. WRIGHT

Mr. Chairman and Gentlemen,

I beg to present my report for the year 1956.

According to Registrar General's estimate the population continues to increase steadily every year and is now 6,610.

The birthrate (16.9) is higher than in 1955 (15.4) and higher than that for England and Wales (15.7).

The death rate (13.2) is higher than last year (10.7) and higher than that for England and Wales (11.7).

The death rate of infants under 1 year of age (9.0) is lower than that for England and Wales (23.8).

The chief causes of death, as has been the case for some years, were from diseases associated with elderly people.

Owing to drought water supply was restricted for a period.

During the year work was completed on the provision of a service reservoir and pumping station to serve the southern part and Forest area of the town, and this should give the whole district a sufficient supply of water.

Work has commenced on the second part of the extension to the sewage disposal works.

During the year 100 new houses were completed, 52 by the local authority and 48 by private enterprise, making a total of 552 houses completed in the post war period. Of this number 360 were completed by the local authority. The total number of applicants for Council houses at the end of the year was 223 and the number of applications received was 63.

Implementation of the Food Hygiene Regulations 1955 has proceeded very satisfactorily and no formal action has been necessary.

60 cases of Infectious Diseases were notified during the year, of which 53 were Scarlet Fever, 1 Pneumonia, 1 Measles, 2 Erysipelas, and 3 Food Poisoning. All the cases of Scarlet Fever were exceptionally mild, and no cases were admitted to hospital. The outbreak of Food Poisoning was a family outbreak, and the symptoms were mild and lasted only a short time. In spite of prompt investigation a definite cause was not established.

No fresh cases of Tuberculosis were notified during the year, and there was one death from Pulmonary Tuberculosis.

I am pleased to say that the number of children receiving primary immunisation against diphtheria maintains the increase shown last year.

I wish to express my thanks to Dr. Mair, of the Public Health Laboratory, and the Public Health Department of the County Council for their willing help and co-operation.

Finally, I wish to thank Mr. R. B. Jones, Public Health Inspector and Surveyor, for his invaluable assistance during the year and you Gentlemen, for your kindness and co-operation.

I am Gentlemen,

Your obedient servant,

A. McM. W. SEGERDAL.

## SECTION B

### General Provision of Health Services for the Area

#### HOSPITALS

All hospitals except some private maternity and nursing homes are under the Sheffield Regional Hospital Board. The County Homes for the aged and infirm people are under the County Council, but when they take ill are the responsibility of the Hospital Board.

#### TREATMENT CENTRES AND CLINICS

The Infant Welfare Centre is held at St. Winefride's Parish Hall every second and fourth Wednesday afternoon under the County Council.

The Tuberculosis Clinic is held at John Street, Loughborough, and is under the Hospital Board.

#### AMBULANCE FACILITIES

The County Council is responsible for all ambulance facilities in the County. Colliery accidents are removed by ambulances provided by the National Coal Board stationed at Nailstone Colliery and Moira Colliery.

#### NURSING IN THE HOME

All District Nursing and midwifery in the home is carried out under the County Council.

#### HEALTH VISITING

This work is very efficiently carried out under the County Council. A Diabetic Health Visitor attends the Diabetic Clinic at Leicester Royal Infirmary, and visits the patients in their homes,

## LABORATORY FACILITIES

This work is carried out at the Public Health Laboratory, Isolation Hospital, Groby Road, Leicester.

Examinations performed:

Faeces and urine	..	..	..	2
Sputa	..	..	..	17
V. & C.	..	..	..	2
Milk	..	..	..	60
Ice Cream	..	..	..	12

## SCARLET FEVER

Scarlet Fever was prevalent from June to December with the exception of the month of August when no cases were notified. The schools were visited and most of the cases seen in their homes. The disease was exceptionally mild and no cases were admitted to hospital.

## FOOD POISONING

Three cases of Food Poisoning were notified. All had eaten the same potted meat. They were members of the same family, and those who did not eat the meat were not ill. On bacteriological examination the potted meat was heavily infected with nonpathogenic organisms. Examination of specimens from the patients were negative. I understand that no other people were ill who purchased potted meat from the shop, and examination of the potted meat from the shop (which was in another area) was negative. Symptoms appeared 6-7 hours after eating the meat. The illness was mild and lasted one or two days.
